D.1 Region Roster

The 59 regions analysed in this study, grouped by country of primary regulatory affiliation. Old World total: 39 regions across 10 countries. New World total: 20 regions across 6 countries.

Country	Regions
<i>Old World</i>	
Austria	Kamptal, Steiermark, Wachau, Wagram
Croatia	Dalmatian Coast
France	Alsace, Beaujolais, Bordeaux, Burgundy, Champagne, Châteauneuf-du-Pape, Jura, Loire, Northern Rhône, Provence
Germany	Baden, Mosel, Nahe, Pfalz, Rheingau
Greece	Macedonia, Santorini
Hungary	Tokaj
Italy	Alto Adige, Campania, Etna, Friuli-Venezia Giulia, Liguria, Piedmont, Sardinia, Sicily, Tuscany, Veneto
Portugal	Douro
Slovenia	Goriška Brda
Spain	Catalonia, Galicia, Ribera del Duero, Rioja
<i>New World</i>	
Argentina	Mendoza, Patagonia
Australia	Barossa Valley, Hunter Valley, Margaret River
Chile	Maipo Valley
New Zealand	Central Otago, Hawke's Bay, Marlborough
S. Africa	Stellenbosch, Swartland
USA	Columbia Valley, Finger Lakes, Napa Valley, Paso Robles, Santa Barbara, Santa Cruz Mountains, Sonoma, Walla Walla, Willamette Valley

D.2 D-Score Matrix and Identity Cluster Membership

All 59 regions with the six identity D-scores (D_1 – D_6 on -2 to $+2$ scale), the assigned identity cluster, and the canonical soul metaphor. Sorted by identity cluster, then by region number within each cluster. Cluster definitions: D_1 Interiority $\leftrightarrow$ Exteriority; D_2 Struggle $\leftrightarrow$ Ease; D_3 Tradition $\leftrightarrow$ Reinvention; D_4 Individual $\leftrightarrow$ Collective; D_5 Urgency $\leftrightarrow$ Timelessness; D_6 Earthly $\leftrightarrow$ Transcendent.

D.3 Terroir Cluster Membership

The terroir partition is fully model-derived: Layer 2 TF-IDF $\rightarrow$ PCA (10 components) $\rightarrow$ K-means ($k = 7$). Cluster count, membership, and naming are determined by the algorithm with no manual override. Top TF-IDF terms indicate the vocabulary features that most distinguish each cluster.

Iberian Continental (6). Top terms: *spain, rioja, do.*

Douro, Catalonia, Galicia, Ribera del Duero, Rioja, Mendoza.

Southern Hemisphere & International (12). Top terms: *zealand, new zealand, australia.*

Alto Adige, Patagonia, Barossa Valley, Hunter Valley, Margaret River, Maipo Valley, Central Otago, Hawke’s Bay, Marlborough, Stellenbosch, Swartland, Napa Valley.

American West Coast (7). Top terms: *ava, wineries, california.*

Columbia Valley, Paso Robles, Santa Barbara, Santa Cruz Mountains, Sonoma, Walla Walla, Willamette Valley.

French Viticultural (10). Top terms: *france, côte, de.*

Alsace, Beaujolais, Bordeaux, Burgundy, Champagne, Châteauneuf-du-Pape, Jura, Loire, Northern Rhône, Provence.

Germanic Rhine (5). Top terms: *germany, vdp, mosel.*

Baden, Mosel, Nahe, Pfalz, Rheingau.

Austrian Danube (3). Top terms: *dac, veltliner, austria.*

Kamptal, Wachau, Wagram.

Mediterranean & Volcanic (16). Top terms: *italy, di, indigenous.*

Steiermark, Dalmatian Coast, Macedonia, Santorini, Tokaj, Campania, Etna, Friuli-Venezia Giulia, Liguria, Piedmont, Sardinia, Sicily, Tuscany, Veneto, Goriška Brda, Finger Lakes.

D.4 Identity $\times$ Terroir Contingency Table

The full 6×7 contingency table $\{n_{ij}\}$ counting regions in each (identity, terroir) cell. Row totals a_i are the identity-cluster sizes; column totals b_j are the terroir-cluster sizes; the grand total is $n = 59$.

	Iber.	S.Hem.	Am.W.	Fre.	Ger.	Aus.	Med.	a_i
Old World Interior	1	0	1	1	1	0	6	10
Outward Ease	0	1	1	2	0	0	1	5
New World Reinvention	2	5	1	0	0	0	4	12
Old World Exterior	1	0	0	3	2	0	1	7
Against the Odds	2	2	0	1	0	1	4	10
The Moderates	0	4	4	3	2	2	0	15
b_j	6	12	7	10	5	3	16	59

Test statistics on this table: $\chi^2 = 38.776$, $df = 30$, $p = 0.131$. ARI = 0.023.

D.5 Per-Cluster Silhouette Breakdown

Mean silhouette score per cluster, with cluster size in parentheses. The overall identity silhouette is $S_I = 0.3029$; the overall terroir silhouette is $S_T = 0.2457$.

<i>Identity</i>		<i>Terroir</i>	
Cluster (n)	Mean s	Cluster (n)	Mean s
Old World Interior (10)	0.34	Iberian Continental (6)	0.27
Outward Ease (5)	0.31	Southern Hem. & International (12)	0.21
New World Reinvention (12)	0.32	American West Coast (7)	0.26
Old World Exterior (7)	0.27	French Viticultural (10)	0.28
Against the Odds (10)	0.33	Germanic Rhine (5)	0.31
The Moderates (15)	0.25	Austrian Danube (3)	0.29
		Mediterranean & Volcanic (16)	0.20

The Moderates is the weakest identity cluster ($s = 0.25$), reflecting its definitional character as the cluster of pluralistic regions where no single identity force dominates. Mediterranean & Volcanic is the weakest terroir cluster ($s = 0.20$), reflecting its size (16 regions) and substantive heterogeneity (Etna and Santorini volcanic; Tuscany and Piedmont continental Mediterranean; Finger Lakes a New World outlier sharing terroir vocabulary with the Mediterranean group).

D.6 SME Change Log

Sixteen score and metaphor changes across thirteen regions, applied after subject-matter expert review of the Pass 5 D-score matrix. All changes are final and incorporated into the canonical documents. Three intentional cluster shifts resulted: Etna and Santa Cruz Mountains → Old World Interior; Nahe and Wachau → The Moderates; Sonoma → New World Reinvention.

Region	Metaphor	Change	Rationale
Bordeaux	Business	$D_3: +1 \rightarrow +2$	Deeper institution separates from the region.
Champagne	Society	$D_3: +1 \rightarrow +2$	Matches Bordeaux as dominant institution.
Etna	Awakening	$D_1: -1 \rightarrow +1, D_2: +1 \rightarrow +2, D_3: -1 \rightarrow 0$	Volcanic introduction of extreme conditions.
Goriška Brda	Fortune	Metaphor: Serendipity $\rightarrow$ Fortune; $D_3: -1 \rightarrow 0$	Cluster shift: — Resolves duplication of Barbara; accidental intervention.
Rioja	Patience	Metaphor: Memory $\rightarrow$ Patience	Resolves duplication of patience captures opportunity.
Santa Barbara	Serendipity	$D_3: -1 \rightarrow 0$	Serendipity is doubly balanced on trajectory.
Santa Cruz Mtns	Obsession	$D_2: +2 \rightarrow +1$	Obsessive private endurance. Cluster Interior.
Sonoma	Authenticity	$D_1: 0 \rightarrow -1, D_3: 0 \rightarrow -1$	Deliberate introduction of intent; modification.
Stellenbosch	Aspiration	$D_4: 0 \rightarrow +1$	Cluster shift: — Individual professional anchors in New World.
Tuscany	Art	Metaphor: Heritage $\rightarrow$ Art; $D_2: 0 \rightarrow -1, D_3: +1 \rightarrow 0$	Art better captures cultural frame; modernized tradition.
Wachau	Monumentality	$D_1: +1 \rightarrow 0, D_2: +1 \rightarrow 0$	Balanced, complex extreme struggle.
Wagram	Earth	$D_1: +1 \rightarrow +2, D_3: +1 \rightarrow +2, D_6: +2 \rightarrow +1$	Moderates. Deeply earthly custodial tradition.
Walla Walla	Community	$D_1: 0 \rightarrow +1$	Place-anchored inward-facing development reach.
